Art Unit: 2862

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- Claims 1-3, drawn to a testing system using only one pulse, classified in class 324, subclass 67.
- II. Claims 4-7, drawn to a testing system using first and second pulse and a receiver, classified in class 324, subclass 67.
- III. Claims 8-11, drawn to a testing system using first and second pulse and without a receiver, classified in class 361, subclass 42.
- IV. Claims 12-22, drawn to a testing system with a processor with calibration feature and a switching circuit, classified in class 361, subclass 2+.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, above mentioned invention has separate utility such as by itself for its intended purpose or different inventive features e.g. testing any electrical component, circuit

Art Unit: 2862

breaker, fuse arc fault interrupter, ground fault circuit interrupter or electrical line. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Mr. Christopher Rauch on January 30, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2862

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 8:00-6:30.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2862

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
